DESCRIPTION

RumiMax is specially formulated to be used by feed compounders and livestock producers. It contains a blend of different flavours and sweeteners with extreme sweetening powder. Compared to sugar the additive sweetness of the single components plus the synergistic effect due to the special combination in about 700 fold. Especially in the first few weeks of life a certain sweetness can promote early feed intake. In this way, young mammals are getting used to take supplementary feed at an early stage, which is very important for a good start and their further development.

The RumiMax is:

- A natural lactose and high quality protein source
- Highly concentrated in protein and necessary amino acids
- Highly digestible
- Easy to handle and mix
- Very stable and has a long shelf-life
- Free from nuclear radiation
- Maintains identical growth results
- Making the feed more tasty and increases feed intake
